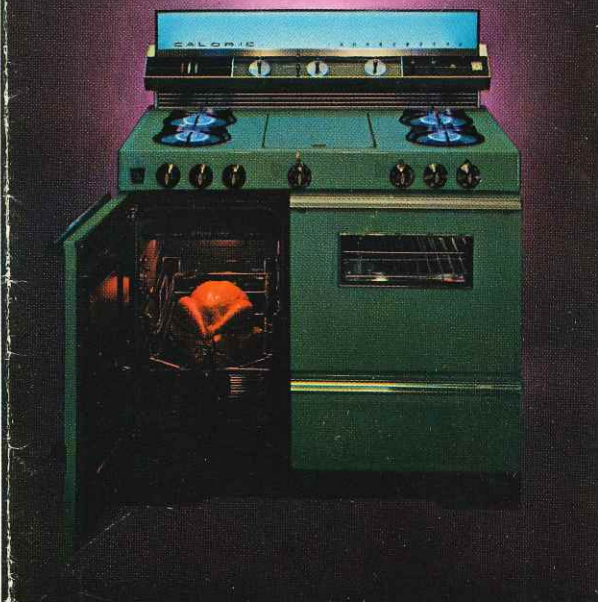
# GAS RANGES



Caloric

presents . . . THE HERITAGE SERIES . . . an exciting collection of contemporary gas ranges, proud descendants of a gracious family of elegant cooking appliances. Products of the historic Berks County area of Pennsylvania where, since Colonial times, craftsmen have made fine cooking equipment for the kitchens of America, the HERITAGE ranges are heirs to traditional Caloric quality. In the HERITAGE line you'll discover a Caloric model best suited for your own kitchen enjoyment. See it demonstrated. Then, add it to your most prized possessions . . . a truly magnificent HERITAGE.

## BUILT-INS

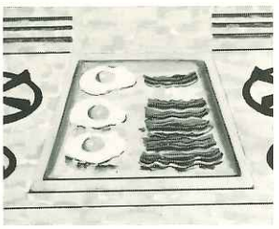
The Caloric Ultramatic Built-in is a dramatic example of fine contemporary appliance styling. Enjoy the convenience of an 18-inch-wide oven that fits a standard 24-inch cabinet. Be assured of perfect cooking accuracy with a Thermo-Set top burner, a six-position broiler, automatic rotisserie, Automatic Keep-Warm oven system, automatic meat probe, cooking completed light, and an automatic oven indicator light. If your preference is for built-ins, your choice can only be a Caloric Ultramatic, pace-setting leader in modern cooking appliances. You can also get sinks and splash plates in color-matching harmonies . . . and rich-gleaming range hoods as well.

SIDE 3

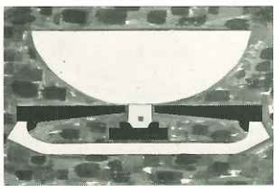
# THE HERITAGE SERIES

## 30

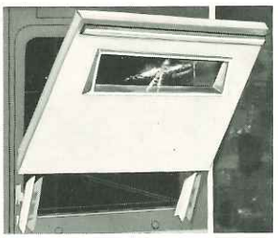
For a delightful balance of size and convenience, put new life in your kitchen with a HERITAGE 30. Satisfy your family or friends with roasts or baked goods from the unusually spacious 24-inch-wide oven, 20-inches deep, with the Automatic Keep-Warm oven system to supervise the meal. Use the Keep-Warm oven, too, to thaw frozen foods. Then, forget kitchen chores with such features as easy-to-clean porcelain enamel, removable broiler and oven doors.



**BUILT-IN GRIDDLE**
opens a whole new world of taste-pleasing menu possibilities.



**THERMO-SET TOP BURNERS**
provide automatic temperature control to top burner cooking.



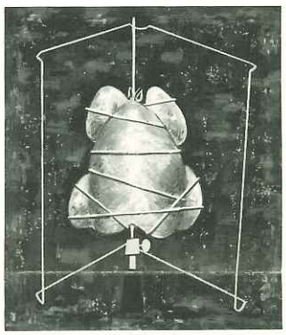
**REMOVABLE OVEN AND BROILER DOORS**
offer an easy answer to convenient kitchen cleanliness.

## 40

For the ultimate in modern cooking luxury, choose the graceful HERITAGE 40 either with double-oven or Ultra-Ray Hi-Broiler and spacious oven. Find new cooking adventure with the thermostatically-controlled built-in griddle, easily convertible to a fifth burner. The Automatic Keep-Warm oven system has an exclusive meat thermometer that assures you of the exact "degree of doneness". And after cooking, this oven keeps food dinner-ready for hours.

## 20

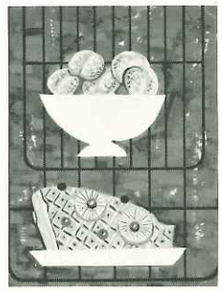
For complete convenience in a compact size, choose the HERITAGE 20, watch-charm beauty of the Caloric range family. Forget pot-watching with Thermo-Set top burner. You'll like the styling, too. The waterfall top, with dripless edge; removable doors on both oven and broiler; and the porcelain enamel finish will make clean-up problems a thing of the past. Get acquainted with Caloric's space-saving answer to a full-convenience kitchen.



**ULTRA-RAY HI-BROILER WITH ROTISSERIE**
brings year-round adventure to indoor barbequeing. Broils foods in half the time . . . at least 30% faster than normal burners resulting in one-half the fuel consumption. And best of all, because broiling is done faster, food tastes better . . . all the natural juices are sealed inside. Cooking flexibility, never before possible, is yours thanks to the Ultra-Ray burner's ability to be turned down to half-rate.

## 36

The HERITAGE 36 is your handsome partner for pleasant kitchenry. The new Automatic Keep-Warm oven system, with its exclusive meat thermometer measuring the inside temperature of meats, cooks precisely to your taste. Then, perfectly cooked, food is held table-ready till you serve, even if that's hours later. Select the HERITAGE 36 either with storage compartment or Ultra-Ray Hi-Broiler with spacious oven. Cut clean-up time with easily removable oven and broiler doors.



**AUTOMATIC KEEP-WARM OVEN SYSTEM WITH AUTOMATIC MEAT PROBE**

Strict mealtime "deadlines" are gone forever. Just turn oven dial to the required temperature and then set the number of hours food should cook. Cooking starts immediately. When food is done, the oven automatically switches to a "keep-warm" level, where it is kept at serving temperature as long as necessary.

To use the automatic meat thermometer . . . just set the oven thermostat, dial the "degree of doneness" desired, and insert the probe into the roast. Food will be cooked as you like it without your specifying a time limit regardless of the size or cut of meat. A "countdown" dial goes into operation 30 minutes before the food is done, and shows remaining time until cooking is completed. The oven automatically switches to a "keep-warm" level where food is kept hot until you are ready to serve.
